

# Microsoft's Movie Venture

**Analysis of Applicable Data**

# Summary

Data from IMDB, Box Office Mojo, Rotten Tomatoes and TMDB support:

- Movies in the following genres
  - Action
  - Adventure
  - Comedy
  - Drama
- Movies with ratings within PG-13 and R
- Movies with a budget of \$250,000,000 or less

# Outline

- Business Problem
- Data
- Methods
- Results
- Conclusions

## Business Problem

Microsoft would like to enter the entertainment sector through films and would like an exploration of what types of films are doing best at the box office. This will help provide a strong opening for their new movie studio.

# Data

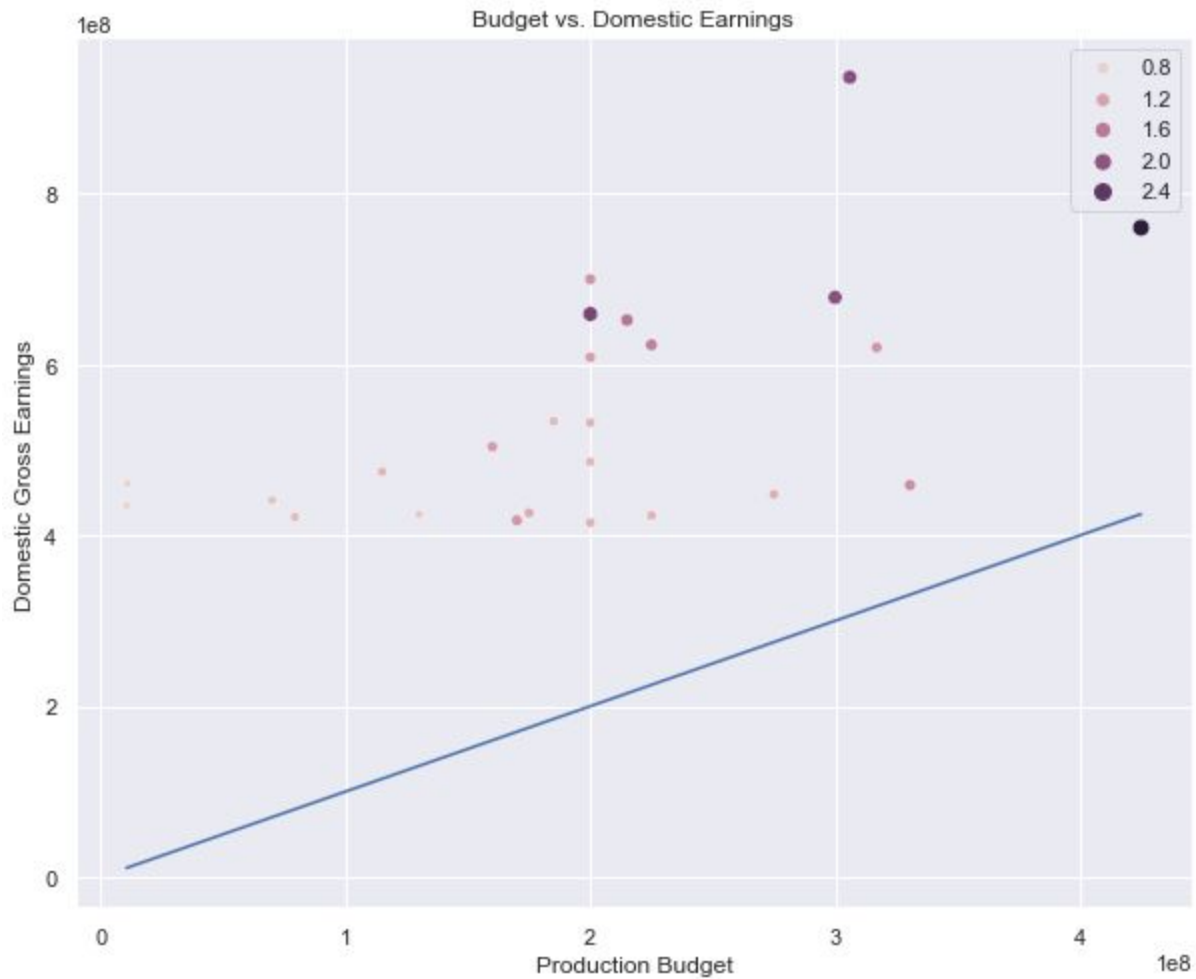

In order to best inform our analysis the following data was used:

- Box Office Mojo Data
- IMDB Data
- Rotten Tomatoes Data
- TMDb Data

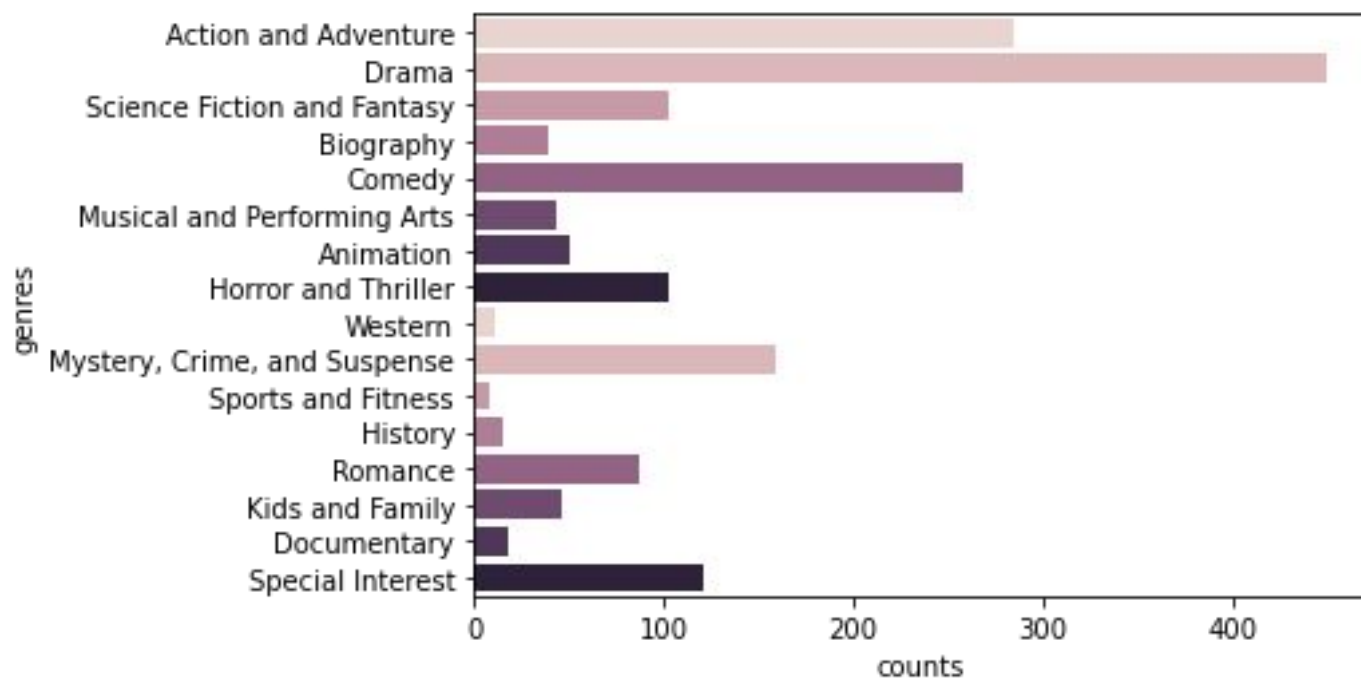

# Methods

- For this presentation the following methods were used
  - Data Cleaning
  - SQL Querying
  - Data Visualization

# Results

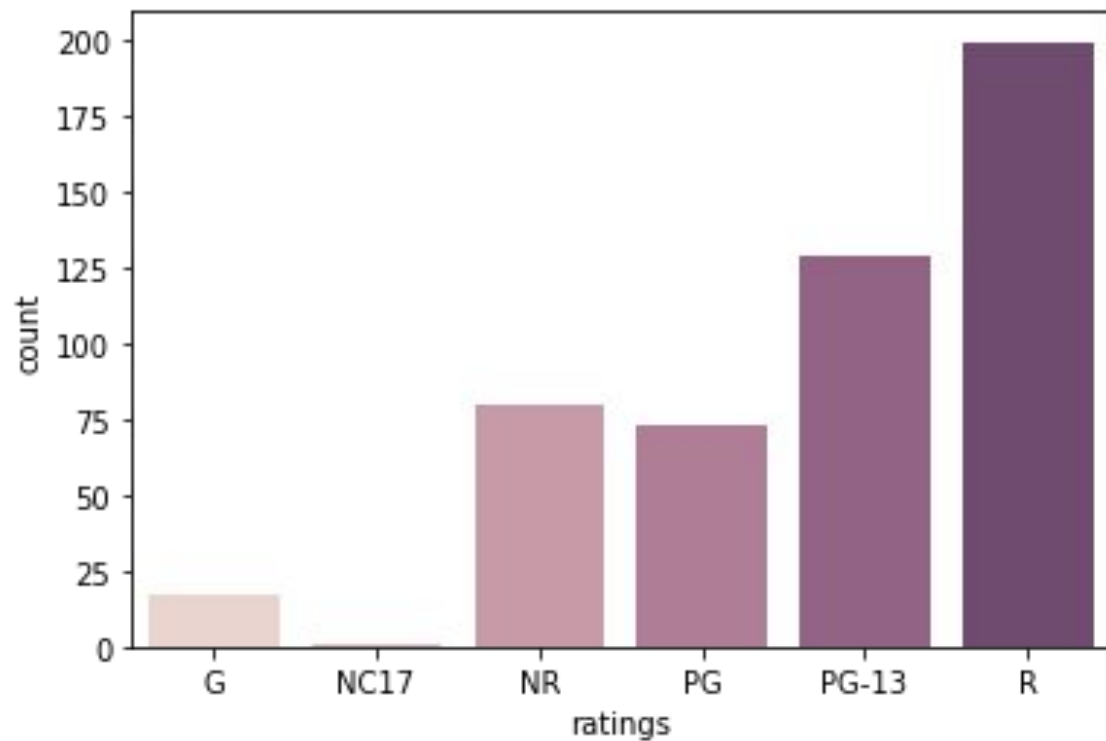

# Results

# Results

# Conclusions

1. Best to produce action, drama, comedy and adventure movies as they tend to do best in the box office
2. Most profitable movies will typically be in the PG-13 and R rating range, while other ratings show limited to nearly negligible returns
3. Data supports a budget of approximately \$250,000,000 as the top 25 movies within the last 2 decades with this approximate budget have obtained sizable returns.
